

Dutch Head 35 Fluid head

The Dutch Head 35 also features Sachtler's patented fluid damping and counterbalance systems. In addition, it has a cross-sliding plate that uses a high precision dove-tailed guidance with a sliding range of 60 mm / 2.4". This enables the camera's center of gravity to be aligned exactly over the head's swiveling axis. The head is able to tilt the horizon, and features a scale on the right side panel that shows the exact degree of third axis movement.
